

GLOSSARY

A

aggregate economy 174

autocorrelation 14,49,53,72,151,179

average cost 106-8

B

Burns Mitchell method 64

business cycles 64-5,74,82,101,104-108.

Breusch-Pagan Lagrange Multiplier 13

bureaucrats 141

C

carbon dioxide emissions 10

centre-periphery model 106

cluster analysis 24,36,39,156,159

convergence in tourism sector 25

concordance index calculations 61

consumers' spending behaviors 4

cross-sectional 10,16,176

construction production index 74

cycle-time interval-country data 124

D

development indicators 5,178

E

Economic variables 65,107

econometric model 19,103,148

economic complexity 61

economic resilience 105

elasticity 8,16,17,20,175,186

explanatory variables 11,13,116,120,148,180,185

European stock market 17

European Commission 64

expansions 70,106-7,121

exogenous variables 49

F

fixed-effects estimator 12, 180

financial burden 18

G

Granger causality tests 55-6

GMM methods 48

growth rate 3,25,67,71,73,96-7,171-3

global economic crisis 104

Great Recession 6,9,97-106,116,127,130

Gross domestic product 150,170

H

Hausman-Taylor estimator 185

heterogeneity 11,176,180-2

heteroscedasticity 14,48,179, 184-6, 194

Hodrick-Prescott filter 66

I

Industrial Production Index 73,81,97

international tourism receipt share 37

income growth 3,171

idiosyncratic error 11,49,180

index of concordance 72

imperfect competitive markets 107

investment projects 108,142

K

Kaldor's theory 166-169

L

level of significance 11,179

linear cost function 106

local residents 9-10,48-54,57,102,172

M

macro-economic variables 65

Mediterranean basin/region 23-5

multivariate analysis 42

multi-level analysis 112,126

multidimensional analysis 36

marginal utility of money 4

monetary factor 146

N

negative externality 10

non-linear trends 67-8

nominal narrow money 74

nominal total import 74

nominal total export 74

nominal wage 73,80-3

nominal exchange rate 10,74,80

O

OLS estimates 16,194

outbound tourism 4-5,10-2

P

Panel data econometrics 11,178

parametric and non-parametric methods 64

productivity in industry index 74
procyclical movements 108
Principal Component Analysis 24,36-38
profit margin 106-10

R

Random effects approach 11
real estate 4
real income per capita 6
real NB discount rate 73
regression coefficients 16,114,126
retail consumer price index 74
RE estimator 13,184
residuals 16,72,184
real domestic saving per capita 17
resource allocation 62
real wage 74
real exchange rate 10,74

S

serial correlation 11,15-6,69,1722,184-6,194
SME sector 143
substitution effect 4,18
standard errors 15,55,72,115,125,184,186,194

T

tourist driving activity and risk 45

tourism top country 41

tourist behaviour 10

tourism demand theory 10

transportation costs 10,18

tourism arrivals 42,45,47,52,56,73,88

tourism overnight stays 73

Total Industry 74

tourism flows 26,28,31-2,39,42,105,111,128

tourism supply 25,107

U

unobserved heterogeneity 11,176-180

unemployment rate 73-6

V

variable 5-17,27,31-42,48-58,61-65,69,72-75,81-84,102

W

wealth effect 3-8,17-9,78
